### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 13 April 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 4, 6-9, 11-13, 16-22, 25-28, 31, 32, 34-36 and 39-42 is/are pending in the application.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4, 6, 11, 12, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 97/00928.

The WO 97/00928 reference discloses a process for refining used oil. The process comprises contacting the oil with an alkaline reactant (e.g., sodium or potassium hydroxide) in the presence of a solvent such as ethylene glycol. Following the contacting, contaminants are removed from the oil by, among other steps, distillation. See the entire document and column 3, lines 7-55 and column 4, lines 1-47 of equivalent US patent 6,072,065.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 7-9, 13, 16, 18-22, 25-28, 31, 32, 34-36, and 39-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 97/00928.

The WO 97/00928 reference discloses a process for refining used oil. The process comprises contacting the oil with an alkaline reactant in the presence of a solvent such as ethylene glycol. Following the contacting, contaminants are removed from the oil by, among other steps, distillation. See the entire document and column 3, lines 7-55 and column 4, lines 1-47 of equivalent US patent 6,072,065.

The WO reference does not disclose the distillation conditions or the amounts of base or glycol.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the process of the WO 97/00928 reference by selecting distillation conditions that would effectively separate the contaminants from the oil including the

specific conditions claimed because the range of distillation conditions disclosed in the WO reference indicates that such conditions are selected to obtain desired fractions. One of ordinary skill select appropriate conditions within the framework disclosed by the WO reference in order to produce desired products.

It also would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the process of the WO reference by using any amounts of base and glycol including the claimed amounts because one of ordinary skill in the art would adjust such amounts to provide the disclosed effect of contaminant removal.

### *Response to Arguments*

The argument that the Chavet reference does not disclose a process for removing contaminants from used oils is not persuasive. In column 1, lines 6-8, of the US equivalent patent 6,072,065, Chavet discloses that the present invention relates to a process for refining used oils. Applicant then appears to argue that the distillation step of Chavet distinguishes the present claims from Chavet. This is not persuasive because the present claims do not exclude any additional steps.

### *Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
